“At PT. Okamoto Indonesia’s we strive for constant improvement and constant change as we believe excellence can never be attained only pursued”

Originally founded as Hyupsung Chemicals, Ltd. Korea, we were the largest self-adhesive tape manufacturer in Korea. Since the relocation of our plant to Indonesia (our current location), we have been supplying natural rubber-based cloth tapes to major brands all over the world via OEM. Since the founding of the company, we have been manufacturing self-adhesive tapes for over three generations and have devoted ourselves to becoming specialized in the field of natural-rubber adhesive cloth tapes through constant iterations of the Kaizen approach to perfect our process.

Our constant devotion and diligence in mastering our field, innovating in ways to optimize our manufacturing process to lower costs while ensuring top quality, allows us to stand out in the field.

The complete start-to-finish control of our products provides us with a level of customer-centric control and customizability that distinguishes us from our competitors. From unprocessed threads to consumer-ready packaged products our full control of every step of the manufacturing process allows us to have a level of flexibility that is unmatched, allowing us to modify, research, and develop new processes to innovate new products with short lead times.

Client loyalty and honesty are our utmost priority as we believe that long-term partnerships between clients and suppliers only arise with complete trust and absolute honesty. We strive to keep a “client-first” mentality in every part of our organizational structure and believe in long-term mutual benefit over short-term gain. Many of our clients have been our partners for decades, assisting each other through tough and tranquil times alike. This is the type of relationship we hope to develop with anyone willing to entrust in us to become their supplier.

PRODUCTION PROCESS

Here at PT Okamoto Indonesia, we have full control of all processes in cloth tape production, “in-house” including:

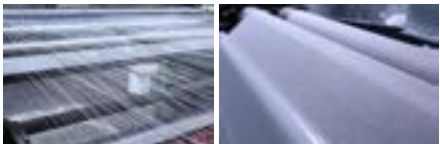

- Yarn sizing
- Cloth Weaving
- PE extruding
- Glue Production
- Glue Coating
- Cutting
- Packaging

This “total control” over our products allows us to have tight control in the quality of our products as well as allowing us to have unmatched flexibility to tailor products specifically to our client’s needs, whether it be improvements in existing products or completely new product creations.

At PT Okamoto Indonesia we offer a wide variety of customizability for each product:

Form factor

- Jumbo Rolls (1300mm x 500m)
- Log Rolls (1300mm x CUSTOM_LENGTH) (Custom Paper Core)
- Finished Rolls (CUSTOM_WIDTH x CUSTOM_LENGTH) (Custom Paper Core)

Packaging

- No packaging, with plastic film dividers between rolls
- Standard transparent Polybag Packaging
- Printed Polybag Packaging
- Customized print/unprinted Shrink Packaging
- Customizable Labels, Stickers, Pads
- Custom box sizes and designed tailored to client needs.
- Palletized/unpalletized

Adhesive

- **Crosslinked 3-6 Adhesive Formula**

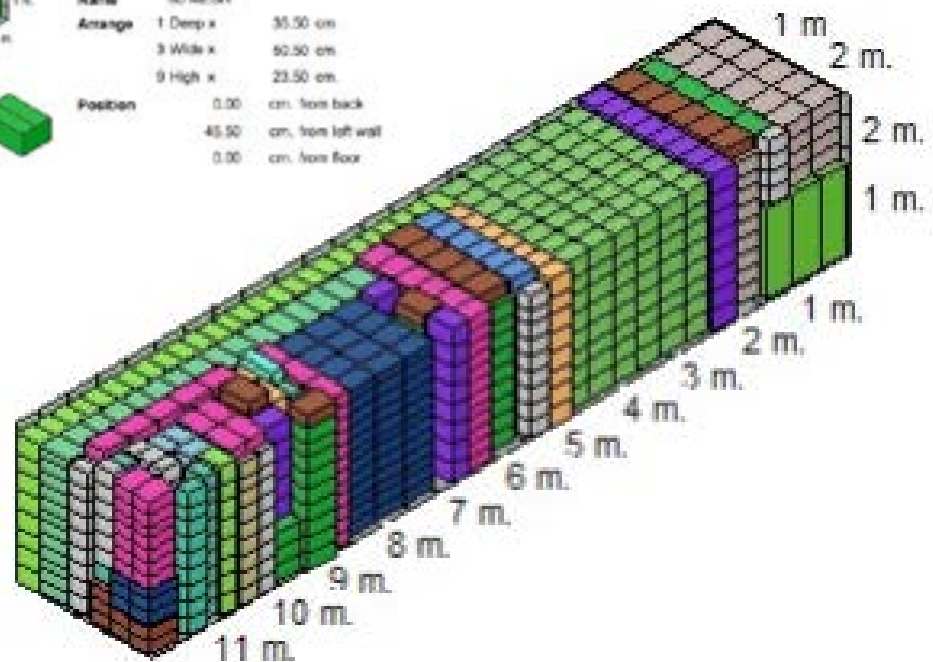

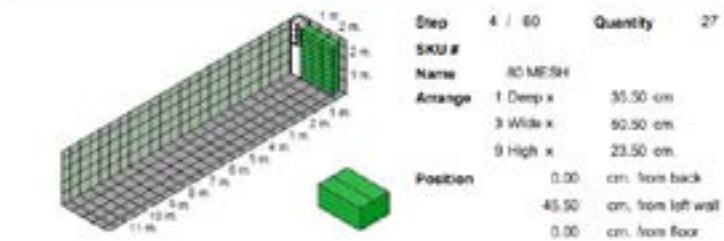

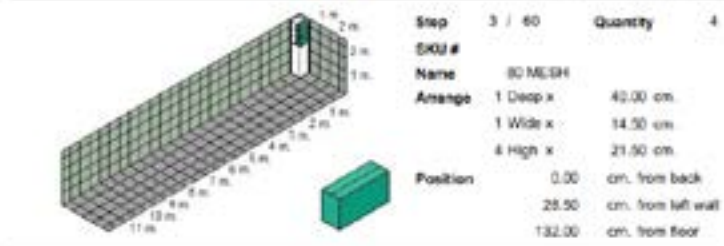

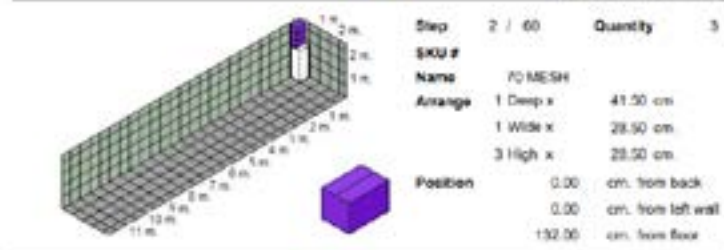

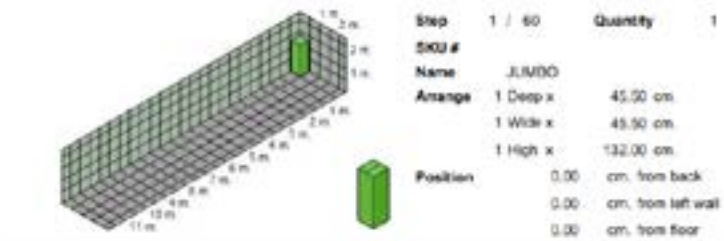

A powerful adhesive formula utilizing a Japanese, chemically stable cross-linked formula that links polymer chains to another using an activator to enhance physical and adhesive properties. Strong adhesive strength shelf life with high temperature tolerances and durability. Rubber used in the adhesive is 100% Natural Rubber. No synthetic or acrylic based adhesive solution are used.

- **Masking Grade Adhesive Formula**

A zero-residue masking grade adhesive formula that prioritizes no residue being left after removal over adhesive power. Though weaker than the cross-linked adhesive, its zero-residue properties paired with the high base temperature tolerance of natural rubber-based adhesives makes it a good choice for construction, indoor work and more. Rubber used in the adhesive is 100% Natural Rubber. No synthetic or acrylic based adhesive solution are used.

Packing Method

Due to the sudden spike in shipping costs in the after of the COVID-19 pandemic, we have begun utilizing container packing algorithms to maximize the number of rolls that can be packed into a standard container. Using computer generated packing algorithms, we can ship up to 20% more

PRODUCT TYPES

OKI42M - Economic grade Duct Tape

A 42-mesh cloth tape designed for economical general-purpose use in a variety of industries. Known for its economic cost with strong adhesion, even the economic grade boasts powerful adhesion with its cross-linked natural rubber-based adhesive formula

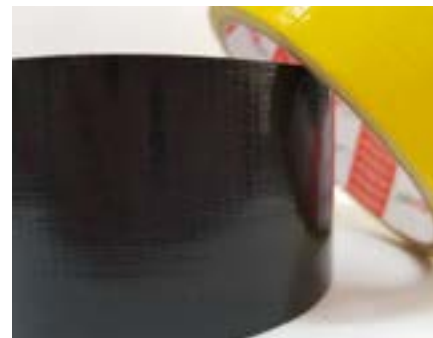

OKI54M - General Purpose Duct Tape

A 54-mesh cloth tape designed for general purpose use in a variety of industries. Known for its economic cost with strong adhesion, even the general-purpose cloth/duct tape boasts powerful adhesion with its cross-linked natural rubber-based adhesive formula. With a higher mesh count than

OKI70M - Industrial Duct Tape

A 70-mesh cloth tape with a thicker backing and adhesion than economic and general grade cloth/duct tapes. With more powerful adhesion and durability than the previous two, the industrial grade and multiple use cases with uncompromising adhesion strength and quality.

OKI80M - Premium Duct Tape

An 80-mesh cloth tape with the thickest backing and adhesion produced by our facility. With powerful adhesion and durability, the premium grade cloth tapes provide uncompromising adhesion with premium quality pe laminated backing.

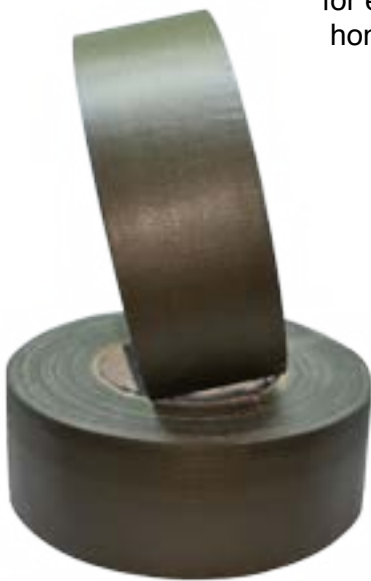

Matt/Gaffers Tape

A tape with a non-reflective matt finish with powerful adhesion, perfect for use on any surface for contractors working within the TV, Theatre, Film, Photography, and industrial staging industry.

Flourescent Tapes

A fluoresent-colored cloth tape with bright colors that grab immediate focus. Brightly lit under a blacklight, it is perfect for event organizers, night-life industries, or homeowners looking to spice up the place.

Military Grade Tapes

A military-grade tape with nearly double the vertical tensile strength of standard tapes of the same mesh. Designed for heavy-duty application use cases where the vertical strength of the roll is preferred over hand-tear-ability. Perfect for use in the military for binding heavy items, patchwork, and more.

Flat Tapes

A highly portable tape roll design with powerful adhesive in a minimalistic form factor. Due to its high portability, the flat tape is perfect for outdoor enthusiasts to keep in their survival kit, or simply to keep in your pocket. Its small form factor is not only advantageous to users but also b2b distributors as it saves over 80% in volume allowing a higher quantity of usable tape to be shipped into one container.

Printed Cloth Tapes

Custom-designed premium printed cloth tapes have endless use cases. Whether it be for premium packaging, floor marking, social distancing labels, accentuating areas in a set, or warning tapes for traffic control, there are endless design possibilities and use cases for printed cloth tapes.
